

TRIPLE 10

A liquid fertiliser representing state-of-the-art fusion – i.e. utilising the best of both worlds – conventional and organic.

Triple 10 (10-10-10) is a liquid fertiliser combining a hot mix N-P-K blend, chelated trace elements and natural growth promotants. These natural growth promotants include fulvic acid, seaweed fertiliser and vitamins. Triple 10 represents state-of-the-art, crop-specific fusion fertilising.

Benefits

- Improve yield & quality.
- Healthy, vigorous growth.
- Additional amino acids & chelated trace elements.

Typical Analysis w/v

- | | | |
|--------------------------------|-----------------------------------|----------------------------------|
| ● Total Nitrogen (N) 10.48% | ● Selenium (Se) 198 mg/L | ● Potassium (as organic) 0.42% |
| ● Nitrogen (as urea) 5.75% | ● Molybdenum (Mo) 39 mg/L | ● Potassium (as hydroxide) 0.05% |
| ● Nitrogen (as ammonium) 4.20% | ● SG 1.3 | ● Potassium (as silicate) 0.02% |
| ● Nitrogen (as organic) 0.53% | ● Conductivity 80 – 100 mS/cm | ● Manganese (Mn) 607 mg/L |
| ● Sulfur (S) 0.22% | ● Total Phosphorus (P) | ● Boron (B) 347 mg/L |
| ● Iron (Fe) 1459 mg/L | ● (water soluble) 10.23% | ● Copper (Cu) 197 mg/L |
| ● Zinc (Zn) 743 mg/L | ● Total Potassium (K) 10.69% | ● pH 7 – 8 |
| ● Calcium (Ca) 558 mg/L | ● Potassium (as phosphate) 10.20% | ● Appearance Thin black liquid |

Storage & Handling

- Warning: This fertiliser contains biuret, max 0.18%. Repeated foliar sprays may cause damage to citrus.
- Store in a cool dry area out of direct sunlight. This product has been tested to store safely down to 5°C. Crystallisation or sedimentation may occur below 5°C. Do not pre-mix or store in diluted form. Seal lid/cap immediately after use.

Instructions

Shake or stir well before use. Where higher water rates are required for good foliar coverage, do not exceed maximum product rate per hectare. Sensitive foliage or plants should be test sprayed prior to full scale application. Frequencies are a guideline only and can be adjusted according to farm practices and/or in conjunction with crop monitoring. Ensure suitable spray conditions (e.g. temperature, humidity, wind-speed), prior to foliar application. Compatibility and/ or performance cannot be guaranteed when combined with other products. Jar test for compatibility and spray test on small area before wide-spread use.

Important

- Avoid spraying close to harvest if produce is susceptible to staining.
- Not compatible with soluble calcium based inputs.
- Do not foliar spray until seedlings are 15 cm high.
- Note: Our Triple 10 formulation is identical for all crop specific products (with the exception of Citrus-Tech Triple 10).

Packaging

- 100 gms
- 10 kg
- 20 kg
