

A task specific, freeze-dried blend of bacterial strains and beneficial fungi.

These multitask microbes can be boom sprayed, fertigated or foliar sprayed depending upon the desired result. This blend has proven to be a remarkably cost effective alternative for those seeking to reduce chemical inputs.

Benefits

- Nitrogen fixation.
- Rapid humus production.
- Increase phosphorus availability.
- Improve nutrient uptake.
- Increase yield.
- Crop quality improvements.
- No withholding period.
- Can also be used to clean up waterways, dams and irrigation sources.
- Can improve septic tank performance.

Composition

Contains specifically selected strains of the following: Azotobacter vinelandii, Bacillus megaterium, Bacillus subtilis, Bradyrhizobium japonicum, Chaetomium globosum, Pseudomonas fluorescens, Pseudomonas putida, Pseudomonas stutzeri, Rhizobium leguminosarum, Streptomyces albidoflavus, Streptomyces cellulosa & Trichoderma lignorum

Important

Contains live organisms. Do not mix with fungicides/bactericides, toxic chemicals or soil fumigants. Sanitise spray tank before application. All brews may need filtering to prevent equipment blockages. All microbial products should be added to the tank last after all other inputs have been diluted. Ideally, apply in the late afternoon. Do not exceed 60 psi. While handling and applying microbial products protective clothing, gloves and face masks should be worn. Wash hands after use. Avoid spraying close to harvest if produce is susceptible to staining.

Storage & Handling

Immuno-compromised persons (e.g. those undergoing chemotherapy) should not handle or be exposed to microbial products. While handling, brewing and applying microbial products protective clothing, gloves and face masks should be worn. Contains live organisms. Avoid aerosols generated by aeration. Store in cool, dry place away from sunlight and below 30°C (preferably under refrigeration). Use as soon as possible after opening but if this cannot be achieved then refrigerate remainder immediately after use and use within 3 months. Contamination of contents may occur at any time after opening and SIPL takes no responsibility for opened product not used immediately. DO NOT FREEZE.

Packaging

- 1 kg
- 20 kg
