

## K RICH

Problems with potassium uptake are often pH-related, due to the inherent alkalinity of this element. K Rich involves potassium citrate – a buffered, super-available form of potassium.

High analysis pH-buffered liquid potassium complexed with citric acid. K-Rich is specifically designed for foliar fertilising fruit, vegetable and grain crops during the potassium-hungry fruit/seed-fill stage.

## Benefits

- Super available, high analysis potassium essential for optimum flower/fruit/seed production.
- Clear formulation ideal for all crop stages.

## Typical Analysis w/v

- Potassium (K) (as citrate) 34.73%
- SG 1.5
- pH 7 - 8
- Conductivity 15 - 25 mS/cm
- Appearance Clear liquid

## Instructions

Shake or stir well before use. Where higher water rates are required for good foliar coverage, do not exceed maximum product rate per hectare. Sensitive foliage or plants should be test sprayed prior to full scale application. Frequencies are a guideline only and can be adjusted according to farm practices and/or in conjunction with crop monitoring. Ensure suitable spray conditions (e.g. temperature, humidity, windspeed), prior to foliar application. Compatibility and/or performance cannot be guaranteed when combined with other products. Jar test for compatibility and spray test on small area before wide-spread use.

## Important

Do not spray if copper hydroxide residue may be present.

## Storage & Handling

Store in a cool dry area out of direct sunlight. This product has been tested to store safely down to 5°C. Crystallisation or sedimentation may occur below 5°C. Do not pre-mix or store in diluted form. Seal lid/cap immediately after use.

## Packaging
