

## PLATFORM

### NEW IMPROVED BLEND – ADDITIONAL STRAINS. The biological base of problem-free agriculture.

Huge numbers of Arbuscular Mycorrhizal Fungi (AMF) (4 species) and Trichoderma (5 strains) together in one breakthrough blend. Root health is plant health and these organisms are the essence of healthy roots.

### Benefits

- Builds humus – Glomalin produced by AMF generates 1/3 of the world's soil carbon.
- Increase root zone with all of the associated benefits.
- Can reduce fertiliser requirements through improved nutrient uptake.
- Boosts phosphate and zinc availability.
- Lifts calcium levels in plants.
- Improves bio-balance and associated plant resilience in the root zone.
- Serves as a synergist to improve nitrogen fixation.

### Instructions

Platform forms a suspension when mixed with water (i.e. it does not dissolve). Constant agitation is required during application to prevent equipment blockages. Platform spore sizes can be up to 260 µm (0.26 mm) therefore it is recommended that an in-line filtration system of 30 mesh (0.5 mm) be fitted to ensure delivery lines are free of contaminants. Ensure there are no places in the hosing which may sag and cause product to settle if left for a period of time. Flushing of lines after use will also prevent contamination.

### Storage & Handling

Immuno-compromised persons (e.g. those undergoing chemotherapy) should not handle or be exposed to microbial products. While handling, brewing and applying microbial products protective clothing, gloves and face masks should be worn. Contains live organisms. Avoid aerosols generated by aeration. Store in cool, dry place away from sunlight and below 30°C (preferably under refrigeration). Use as soon as possible after opening but if this cannot be achieved then refrigerate remainder immediately after use and use within 3 months. Contamination of contents may occur at any time after opening and SIPL takes no responsibility for opened product not used immediately. DO NOT FREEZE.

### Important

Contains live organisms. Do not mix with fungicides/ bactericides, toxic chemicals or soil fumigants. Sanitise spray tank before application. All microbial products should be added to the tank last after all other inputs have been diluted. Ideally, apply in the late afternoon. Do not exceed 60 psi. While handling and applying microbial products protective clothing, gloves and face masks should be worn. Wash hands after use.

### Packaging

- 200 gms
- 1 kg
- 100 kg
